Recommendations

1) I would recommend page pagination whereby your web address for specific categories are written in plain english for example [redacted]/cart.php?target=category&category_id=8 would be written as [redacted]/clothing.

This would help with your search engine optimisation as well as making your site easier to navigate by human beings, as people tend to search for words not abstract numbers, This is something [redacted]

2) More social networking links, It's free to set up Facebook and Myspace pages all of which can be used to promote your website.

3) A share this link adding to your website this allows visitors to your site to easily share any of the pages they find with other people

4) Link in to your ebay shop so each time you list a product on ebay you also link it back to the product on your own website

for example:

[redacted]Pirouette-Hanoverian-Bridle_W0QQitemZ160370505623QQcmdZViewItemQQptZUK_Horse_Wear_Equipment?hash=item2556d3b797#ht_500wt_956

Place a link to that product on your own shop:

[redacted]/cart.php?target=product&product_id=1579&category_id=90

PurplePanda

5) Use the information in the Top Ranking Websites by found Keyword report to decide who are your competitors and then try to acquire links back to your site from the same sources as them for example:

Discount Western Saddles and Tack from Tack South

<http://www.tacksouth.com>

Their second highest incoming link is from <http://www.walkerswest.com/links.htm>

And you may add a Link back to your website from here:

http://www.walkerswest.com/links.htm#swap_links
